WORK EXPERIENCE

OneBanc Technologies - Gurugram   Oct 2021 -present

- **OneBanc Website**

  - Implemented lazy-loading mechanism which reduced the initial UI loading time by 70%.
  - Tested site compatibility across multiple browsers and devices, debugging issues and addressing inconsistencies.
  - Handled unsupported mode and URL functionality.

- **Aadhaar Verification and MPIN Creation Screens**

  - Developed Aadhaar, OTP and MPIN screens which take the input, format, validate and verify the details at every step.
  - Integrated communication between two web pages and created a responsive bridge between the two, such that the first page completely handles the actions of the second page.
  - Extended the project by creating a plugin for the input box, which helps the developer to create input boxes with pre-defined attributes.

- **OneBanc Salary Calculator**

  - Developed a salary calculator which will show the in-hand salary of an employee if he/she associates with OneBanc.
  - It will calculate the taxable salary based on the salary inputs and the deductions possible like pf, standard deductions, 80C, etc. This will be used to calculate tax and final in-hand salary after including OneBanc cash backs.

EDUCATION

Chandigarh University   2018 -present

- Bachelors of Computer science and engineering

TECHNICAL SKILLS

- JavaScript, React JS, Next JS, HTML, CSS, Redux, Bootstrap, REST API, Node JS, Express JS, Mongo DB
